Medical Device

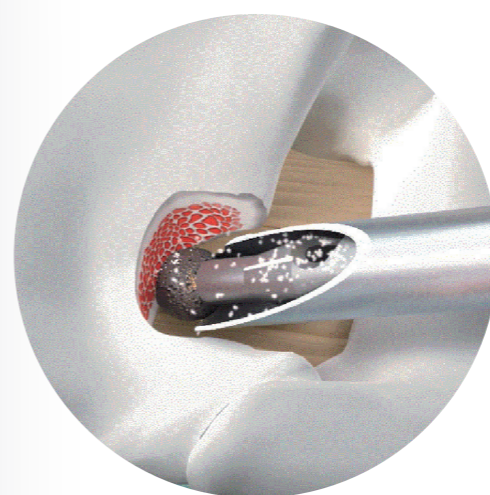

endovision Burr & Blade

Endoscopic arthroscopic surgical instruments

It is connected to the Shaver System and used to be used, and a connector is provided in consideration of the usage environment.

Made with sophisticated molds, stable operation without tissue damage

- Round Burr
- Diamond Burr
- Oval Burr
- Saw Blade
- Full Radius Blade
- Half Saw Blade

CAT-Burr&Blade-E01

Round Burr Diamond Burr Oval Burr

endovision Burr Shielded type

- Provides protection for Dura and Nerve roots.
- Effectively prevents tissue tangled to the Burr tip (As the burr rotates, tissues that become entangled around the Burr tip are released by the surrounding shield.)

Round Burr Diamond Burr Oval Burr

endovision Burr Non-shielded type

- Offers better visibility compared to the shielded type.
- Allows for more precise confirmation of the current drilling location.(More intuitive Drilling)

endovision Burr Series VI

Product	Type	Model No.	Connector	Unit(mm)
VI Round Burr	Shielded type	URB-50-13-40		L : 130 D : Ø 4.0
	Non-shielded type	URB-50-13-40-NS		
VI Diamond Burr	Shielded type	UDB-50-13-40		L : 130 D : Ø 4.0
	Non-shielded type	UDB-50-13-40-NS		
VI Oval Burr	Shielded type	UOB-50-13-40		L : 130 D : Ø 4.0
	Non-shielded type	UOB-50-13-40-NS
